Art Unit: 2823

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-13, 15-28, 49-60, 62-68, and 70-83, are rejected under 35 U.S.C. as being unpatentable over Bandyopadhyay et al, in combination with Yamada'778, Yamada'020, Wolf and Cronin.

The rejection is maintained as stated in the Office Action mailed 10-20-00, and as stated below.

Applicant argues that layer 22 of Bandyopadhyay et al is not properly characterized as a "passivation layer" because it is not the final layer deposited after all metal layers. However, instant element 4 is disclosed to be encompassed by the term and, as can be seen in Figure 1, metallization above element 4 does not preclude such a characterization. Furthermore, Yu et al (U.S. Patent 6,130,457), employs the term in labeling of layer 62 which is analogous to layer 22 of Bandyopadhyay et al.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
